

Instructions to Follow:

1. Download the zip file
2. Unzip the file
3. Read Project Report
4. Open TheMaze1.3.exe
5. Click Play
6. Follow the instruction and play the game

If the game does not open then you may have to download Unity Web Player via firefox or safari or internet explorer and then try the process again.

If you wish to view my Unity Physics, Unity Design or basically my work I put into the game via unity, then you must download the latest version of unity and upload this file.

If you wish to see my code then you must download unity and upload this game to your unity to view all the C# code.

I have included the TheMaze1.3completed.rar file just in case unity does allow my .exe file.

Thank you for your support and guidance

Hope you Enjoy my game !
